VARIABLE DATA FOILING
FOR A TACTILE EXPERIENCE

While special effects, such as spot gloss, clear dimensional printing or a metallic and shiny look-and-feel, could also be created with the conventional production methods of the past, this was inefficient and time-consuming – ruling it out for short-run jobs under tight timelines. However, with today's innovative inkjet technologies and inline foiling systems, such creative prints with outstanding effects can now easily be offered to a broader clientele.

The MGI digital varnish & hot-foil technology turns printed jobs into spectacular and irresistible print products that will immediately catch your customers' and their customers' attention. With the digital varnish technology, you'll find it easy to spot coat digital prints, highlight defined areas, or add 3D effects – all of which helps you to offer attractive and vivid print products that provide a tactile experience. What's more, the combination with the inline hot foiling module iFOIL gives you a wide choice of colours and brilliant effects.

4 EASY STEPS

ENABLING YOUR BUSINESS

STEP 01.
IDENTIFY
UNDERSTAND THE OPPORTUNITY

As the print and communications market continues to evolve, it is paramount to add value to print. Producing high quality prints is market standard today, but adding digital spot coating and foiling makes prints stand out! This is a unique opportunity that will enhance the profitability of your business. We offer

STEP 04.
IMPLEMENT
MAKE IT HAPPEN

We continue to work with you during and after the implementation – so that you keep benefitting from our knowledge, expertise and innovation. To ease your smooth adaptation to changing market conditions, our team of business consultants will continue to support your investment, suggesting new ideas and regular innovation.

Professional services
After your decision to invest, our teams will work with you to map out a schedule of implementation showing in detail at what stage which steps will be carried out.

you up-to-date market information on the trends in our industry and explain how digital spot coating and foiling impact the print market. This information gives you deeper insights into this business opportunity showing you how digital spot coating and foiling can help you stay ahead of your competitors.

STEP 02.
ASSESS
DEFINE THE NEED

We support you in assessing where your company stands with regard to actively offering the added value of spot gloss, dimensional special effects or metallic. Once you know how this may benefit your customers, you need to get clear on the practical implications.

On top of a specific assessment of your business, our dedicated business development managers and consultants can provide you with a 360-degree view in an easy-to-understand report, highlighting what the opportunities for spot-coating and foiling are in your business.

1234
DIGITAL|||
enabling your business

For more details please visit: http://digital1234.konicaminolta.eu.

Training
Our customer training development teams support your learning and development programme, and give you detailed feedback so you can measure the progress of your team. We do not only look at using the system but also in selling the applications and calculating to make most out of your investment.

Service
Our trained software service teams and service technicians are highly skilled and have a network of call centres to fall back on.

STEP 03.
JUSTIFY
WORK OUT THE PLAN

Konica Minolta has invested in support teams that work with you to help maximise your return on investment. We have created an ROI calculator for the digital varnish & hot-foil technology, making it easy to take existing print jobs and

understand the accurate cost of adding varnish and 3D elements to a job. The calculation takes into account materials, labour, running costs, investment costs and crucially the bottom line profit.

MARKET TRENDS

There is no longer much money to be made in printing "me-too-products"; the only way for you to achieve worthwhile profits is to take your creativity to a new level. This is where varnishing and foiling come in – disruptive technologies that enable you to increase your profits without getting out of your comfort zone.
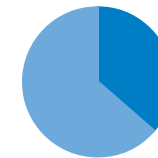

THE IMPACT OF VALUE ADDED FINISHING ON DIGITAL PRINTING

Digital production printing in Western Europe is expected to increase at an average growth rate of 5.1%* per year. Until now, technology for finishing did not keep up with the trends in digitalisation. With our digital solutions for tactile finishing, Print Service Providers' profit margins on digital print enhancement can be very high (50% to 400% **) resulting in a quick return on investment (ROI).

DIGITAL PRINT APPLICATION WILL INCREASE

Digital packaging is a very large sector of the printing industry, and one that is unaffected by the general move to electronic media. Publishing print applications such as books, catalogues and magazines, are expected to grow on a very large scale. These digital print applications are suitable for digital print enhancement like varnish and hot-foiling.

YOUR ADVANTAGES WITH
THE JETVARNISH technology

KONICA MINOLTA PRINT HEADS

– With genuine Konica Minolta piezoelectric drop-on-demand print heads

ECO-FRIENDLY IN-LINE LED DRYER*

– On-the-fly drying & curing with integrated LEDs*
– No additional drying time required
– Ozone-free and without heat thanks to LED technology*
– Low power consumption

VARNISHING DIGITAL AND OFFSET PRINTS

– Varnishing directly on toner without lamination
– Varnishing on offset prints
– Accurate sheet-to-sheet registration with AIS SmartScanner
– Quick and easy setup supports digital printing business model

AIS SmartScanner SYSTEM

– Full page scanner to achieve the perfect registration on the fly
– Scans up to 300 reference points and corrects skew, stretch, shift, contractions and misregistration sheet by sheet
– No crop marks, less setup time, less waste

VARIABLE DATA VARNISHING & FOILING

– For personalised spot coating and foil applications
– High flexibility
– Exclusive look and feel

HIGH PRODUCTIVITY WITH SINGLE PASS PRINTING

JETVARNISH 3DS (WITH 1 ROW OF PRINT HEADS)**
– Up to 2,077 A3 sheets/ hour with a varnish thickness of 21 µm
– Up to 1,468 A3 sheets/ hour with a varnish thickness of 43 µm
– Up to 547 A3 sheets/ hour with a varnish thickness of 116 µm

JETVARNISH 3D EVOLUTION
– Up to 3,123 ISO B2 sheets per hour in all versions
– The Evo 75 can reach up to 4,200 ISO B2 sheets per hour
– Up to 2,291 ISO B1 sheets per hour

JETVARNISH 3D
– Up to 3,123*** B2 sheets size per hour (flat spot UV coating or 2D).

*   JETVARNISH 3DS is equipped with the in-line LED dryer curing unit
** The optional 2nd print bar increases the speed or doubles the thickness
*** Speed can vary according to different printing parameters

BOOKS, BOOK COVERS, MAGAZINES, BROCHURES

Ability for on-demand printing and enhancing to reduce storage logistics and costs

EXCLUSIVE BUSINESS CARDS, GREETING CARDS, HIGH-END INVITATIONS

New types of business cards or greeting cards with special effects on different substrates in small amounts

PACKAGING, CARTONS

Appealing and eye-catching packaging can be produced on-demand, with the ability for personalization and versioning in small amounts

DIRECT MAILINGS, POSTCARDS

Eye-catching designs for more targeted mailings and personalization as a differentiator from electronic communication

OTHER APPLICATIONS

– Calendars (wire-o-type, strip type, table calendar, book calendar)
– Tickets (VIP tickets, admission tickets, etc.)
– Point-of-purchase material, promotional material

TYPICAL APPLICATIONS

For appealing and eye-catching print applications

10 GOOD REASONS

to invest into the digital varnishing

and hot-foiling technology:

1 TURN PLAIN PRINTED JOBS INTO REMARKABLE PRINTS

The digital varnish technology enables you to upsell your day-to-day print jobs and increase your profit. An even more appealing effect can be achieved by taking advantage of the reflective qualities of foil.

6 SIMPLIFY YOUR WORKFLOW

The MGI digital varnish & hot-foil technologies are the perfect, simple and straightforward solution to offer offline print enhancement. With the AIS SmartScanner, you can easily create print files with perfect front to back registration on every sheet –without the need for the operator to intervene.

7 SHORTEN YOUR LEAD TIMES

With the digital solution, you will reduce your setup times, which saves you time and money. There is no need to invest into expensive plates or dies. All that's required is a digital file.

2 PERSONALISE WITH VARIABLE DATA FOILING

Make print jobs unique by personalising them with spot coating and foil applications.

3 TAKE ADVANTAGE OF THE TACTILE FINISHING AND CREATE A SENSORY EXPERIENCE

With the ability to apply variable varnish thicknesses in one single pass, you can easily create irresistible 2D and 3D applications with the look & feel effect

4 DIFFERENTIATE YOURSELF

Add value to your existing print services and attract new customers by offering a wider variety of print and embellishment jobs.

5 UPGRADE YOUR SERVICES

Offer a broader range of substrates like matte or glossy laminated surfaces, layered paper, plastic, PVC and other coated materials.

8 SMALL DIMENSIONS

The smart combination of varnishing and hot-foil stamping does not require much space and can be installed in any location.

9 GO "GREEN" WITH ON-THE-FLY TECHNOLOGY

Integrated UV lamps provide "on-the-fly" drying and curing with lower energy consumption than traditional UV systems.

10 BE CREATIVE AND DEVELOP NEW PRINT APPLICATIONS

The smart combination of spot varnish and hot-foil stamping lets you create attractive 2D & 3D applications and impress your clients with individual designs – everyone will love what you do.

TECHNICAL SPECIFICATIONS
MGI JETVARNISH 3DS & iFOIL S

JETVARNISH 3DS

MGI JETVARNISH 3DS

PRODUCT SPECIFICATIONS

Printing technology	MGI's exclusive inkjet engine technology; Drop-on-Demand (DoD) technology; Piezoelectric printheads,developed and manufactured by Konica Minolta; Single pass printing; Flexible & scalable printing architecture
Coating thicknesses	Depending on your file, the inks used and the type of surface of your sheet, the coating thickness can vary. On laminated and aqueous coating: 21 μm – 232 μm* for 3D raised effects and tactile finish. On toner and coated paper: 30 μm – 116 μm/232* μm for 3D raised effects and a tactile finish
Production speed	**In 2D/flat mode:** Up to 2,077 A3 sheets per hour (with 21 μm) **In 3D/raised mode:** Up to 1,468 A3 sheets per hour (with 43 μm) Up to 547 A3 sheets per hour (with 116 micron)
Registration	SmartScanner coupled with Artificial Intelligence (AIS) for fully real-time automated sheet-to-sheet registration process. No crop mark required.
Formats	Min: 21 x 29.7 cm / 8 x 11.8" Max: 36.4 x 102 cm / 14.33 x 40.15" Max: Printable Width 35.3 cm
Substrate thickness	Min: 135 g/m² and not less than 150 μm or 6 mil before printing & lamination Max: 450 g/m² and not more than 450 μm or 18 mil before printing & lamination; Motorized height-adjustment print heads
Substrates**	Printing on most matte or glossy laminated surfaces, with or without aqueous coating, layered paper, plastic, PVC and other coated materials.
Varnish on toner	Spot 3DS coat directly onto most digital prints with no lamination or coating required.

UV coatings and capacity	3D varnish delivered with a 10-litre tank capacity
High capacity Automatic feeder	Feeder able to handle a paper pile up to 30 cm 2,500 sheets at 135 g/m²
High pile output stacker	Stacker able to handle a paper pile up to 30 cm; 2,500 sheets at 135 g/m²
Paper path	100 % flat paper path; Vacuum feed system; Air feed system; Automatic double sheet detection; In-line LED dryer "On-the-fly" drying & curing via integrated LED Spot Coated sheets can be immediately finished or handled, no additional drying time required
Front end system	Dedicated PC; CPU + touch-screen + keyboard/mouse; Ethernet connection 10/100/1000 BT (RJ 45); Built-in Application Software Suite; Comprehensive job queue management; Predictive printing cost calculator (coating consumption); Dedicated image editor to do local and fast image editing prior to production
Maintenance & remote technical support	Daily maintenance completed in less than 10 minutes Majority of procedures are automated; Automatic cleaning system; From cold start to production in less than 10 minutes; Remote troubleshooting & support via included video/web camera (high speed internet connection required)
Operator panel	Integrated user-friendly LCD touch-screen
Options	**Twin bar option:** 2nd print engine to increase 3D print speed and coating thickness, up to 232 µm variable data option. **Variable data option:** Complete system including RIP, barcode reader and MGI software to automatize the association between a pre-printed barcode and its specific spot coating file
Dimensions (L x W x H)	4.26 (5.47*) x 1.14 x 1.80 meter *(with the longest paper extensions installed) 1 metre clearance required on all 4 sides
Weight	± 1,100 kg
Electrical requirements	7.5 kW (32 A) at 220 – 240 V; 2 plug CEE/IP44; 32A (1P+N+E)
Operating	Temperature: 18 to 30°C Environment Relative humidity: between 35 – 55% (no condensation)
Respecting the environment	Eliminates resource waste (wasted electricity, paper and varnish); No plates (offset) or screens (screen printing); No cleanup or preparation between jobs; Drastic reduction in amount of consumables and use of bulk packaging; Coating without volatile solvent.

iFOIL S

PRODUCT SPECIFICATIONS

Production speed	Up to 2,298 A3 sheet size per hour (or 20 meters/min)
Formats	Min: 21 x 29.7 cm Max: 36.4 x 102 cm
Hot foil stamping area	32 x 102 cm
Substrate thickness	Min: 135 g/m² and not less than 150 µm/6 mil before printing and lamination Max: 450 g/m² and not more than 450 µm/18 mil before printing and lamination Motorised height-adjustment print heads
Substrates	Most matte or glossy laminated surfaces, with or without aqueous coating, layered paper, plastic, PVC and other coated materials Most digital prints without any lamination or coating
Foil rolls	Standard internal core: 1 inch - Min./Max. widths: 10/36 cm 400 meter length (average) Up to 2 rolls loaded simultaneously on the same holder 3" internal core is optional
Embossing	From 21 µm to 116 µm thickness From 21 µm to 232 µm thickness (Twin Bar optional)
Compatibility	Online module that connects to all JETVARNISH 3DS
Dimensions (L x W x H)	2.09 x 1.24 x 1.80 meter
Weight	± 850 kg
Electrical requirements	7.5 kW (32 A) at 220 – 240 V – 50/60 Hz 2 plugs CEE/IP44 32A (1P+N+E)
Options	High capacity stacker for paper stacking up to 60 cm paper height 3" core inch foil holder

The default sheet format is A3, unless otherwise stated
1) with an additional option installed
2) speed will vary according to printing parameter used
3) confirm substrate/toner compatibility with Konica Minolta

* With theTwin Bar
** The used substrate needs to be either coated or laminated. Otherwise the media is absorbing the varnish and the desired effect might get lost
